

RISK MANAGEMENT PROPERTY PROTECTION PLAN

FIELD RISK MANAGEMENT CONSULTANTS SAFETY AUDIT

Our risk management consultants work with entities to facilitate safety audits to identify unsafe acts or conditions. An audit would include the review of a building's interior and grounds to look for certain aspects including overall housekeeping, conditions of steps, sidewalks, parking lots, lighting, and general safety hazards. An effective safety audit can be used to uncover safety and health problems before personal injuries, property damage, or interruptions in operations occur.

DUFF AND PHELPS

Our team has contracted with Duff & Phelps to perform appraisals on all buildings to ensure proper insurance to value and to assist in meeting GASB reporting requirements. Duff & Phelps will be checking the members current values and building specifics to ensure we have the most up to date data including any new buildings they may have acquired.

SERVPRO EMERGENCY READY PROFILE

SERVPro Emergency Ready Profile is a disaster response company that spreads pre-arranged teams and resources around the country. They are a partner to help mitigate the property losses after a disaster. SERVPro provides the critical information needed to begin mitigation and recovery services. They are a leader in fire and water damage response and can help you quickly get your property back in working order.
